Solutions Engineer with 6+ years across software engineering, AdTech, applied AI and customer-facing technical delivery. I build and deploy decision tools, automation systems, data products and LLM-powered AI agents that turn ambiguous business problems into operational solutions. Experienced in scoping AI use cases, building prototypes, defining technical requirements, coordinating with engineering and data teams, and translating complex AI capabilities for senior business and technical stakeholders. Hands-on with Claude, Codex, Python, JavaScript, SQL, Databricks, Google AI Studio, agent orchestration, and workflow automation.

WORK EXPERIENCE

Associate Solutions Engineer

MiQ Digital

September 2025 – Current

London, United Kingdom

- Designed and own the Europe BLS Strategist Agent, a RAG-powered decision-support tool using Glean that guides sales teams to the optimal brand-lift study partner based on feasibility, margin logic, and regional strategy. Engineered structured prompting and output validation, and evaluated response quality before rollout. Used daily by commercial teams, cutting decision time by ~90% and improving margins on BLS offerings.
- Contributed to MiQ's AI Efficiency Strategy Hub (UK 2026), positioning deployed agents within an impact/effort framework and collaborating on agent design, deployment, and access strategy across the business.
- Architected a reusable measurement framework joining survey-panel exposure data with DSP log-level data, unlocking audience-, frequency-, and format-level brand lift insights beyond standard reporting. Piloted with an enterprise client, built the value assessment deck for senior leadership, and defined the roadmap for scaling across channels (display, CTV, audio).
- Partnered with data engineering to define end-to-end onboarding of a new measurement API into Databricks/Unity Catalog (S3 structure, schema, pipelines), and represented UK Solutions in recurring vendor forums to align on documentation and delivery milestones.
- Designed an attention-score $\times$ brand-lift correlation study plan, defining data joins and analysis approach - adopted by data science as a UK case study for attention-based measurement.
- Led enablement sessions on first-party data onboarding for commercial teams and owned the UK Solutions quarterly newsletter, translating technical capabilities into accessible updates for the wider business.

Programmatic Executive

Dentsu Digital

July 2023 – August 2025

London, United Kingdom

- Technical advisor on weekly strategic client calls across Tech, FinTech, and Hotel verticals, translating campaign performance into actionable business recommendations.
- Delivered an 80% uplift in ROAS for lower-funnel campaigns through rigorous A/B testing and data-led creative optimisation strategies.
- Built a GPT-4 powered chatbot prototype during an OpenAI hackathon to accelerate client discovery conversations - first hands-on LLM build.
- Automated performance dashboards (Google Apps Script), cutting manual reporting effort 70% and improving data accuracy.
- Mentored junior analysts on platform usage, campaign QA, and troubleshooting best practices.

Programmatic Display Junior Associate

Dentsu Digital

July 2022 – June 2023

London, United Kingdom

- Diagnosed technical campaign issues by analysing performance data and investigating platform logs across DV360 and Adobe Advertising Cloud.
- Built a custom PowerShell automation bot for asset QC and campaign trafficking, cutting manual effort by

90% and ensuring zero-error execution.

Software Engineer

June 2018 – June 2020

Deloitte Advisory (US Offices of India)

Hyderabad, India

- Built automation frameworks for enterprise financial software (PowerShell, ExtJS, SQL Server), reducing client onboarding workload 70–80%.
- Won the Deloitte Innovation Award for an internal application that eliminated 15+ hours of weekly audit tasks per user.
- Led an internal product engineering pod with US counterparts, coordinating milestones, QA cycles, and release readiness across time zones.

Intern

January 2018 – May 2018

Deloitte Advisory (US Offices of India)

Hyderabad, India

- Developer for a FinTech solution, improving code stability and performance through debugging and optimisation.
- Co-built a blockchain-based insurance-fraud proof of concept, leading to the successful demonstration and validation by senior leadership.

AI & PERSONAL PROJECTS

- CoverDriveClub.in - Founder & Operator
 - Founded and run a cricket apparel e-commerce brand, and built the AI tooling that operates it end-to-end.
 - Designed an agentic operations system (orchestrated with OpenClaw) with intelligent routing, failure handling, cost tracking, and human-escalation logic. This automated ~70% of operational workflows across content generation, marketing, and internal business processes.
- GeoPulse - Geopolitical Intelligence Dashboard
 - Full-stack production dashboard (Next.js, Python, Vercel) delivering daily geopolitical intelligence with zero manual intervention.
 - Engineered a self-updating pipeline: scheduled GitHub Actions trigger automated web search, Claude synthesises and structures the findings as validated JSON, and the frontend renders the briefing - owning pipeline orchestration, structured-output parsing, and retry/error handling end to end.

EDUCATION

Loughborough University

September 2020 – September 2021

Master of Science, Sport Management

Loughborough, United Kingdom

Vellore Institute of Technology

June 2014 – June 2018

Bachelor of Technology, Computer Science and Engineering

Chennai, India

Final Year Project: Real-Time Driver Action Recognition using CNNs and Raspberry Pi.

SKILLS

- **AI & LLM:** Claude API, Codex, Claude Code, Google AI Studio, Prompt Engineering, Context Engineering, RAG, Agent Orchestration, MCP, Evaluation Frameworks
- **Languages & Tools:** Python, JavaScript, SQL, PowerShell, Google Apps Script
- **Data & BI:** Databricks, Tableau, Power BI, Excel
- **Platforms & Infrastructure:** DV360, Amazon DSP, Campaign Manager 360, The Trade Desk, Glean, Yahoo DSP
- **Ad Tech Ecosystem:** Pixels, Ad Tags, Bidding Logic, Auction Mechanics
- **Other:** Wireframing, Cross-functional delivery, Technical discovery and documentation, Client advisory, Stakeholder communication, Workflow design, Operational problem solving
